DETAILED ACTION

Claim Rejections - 35 U.S.C. § 112

1. Claim 7 (and therefore 8-10) are rejected under 35 U.S.C. § 112, 2nd paragraph,

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The term "said microcontroller" lacks antecedent basis.

Claim Rejections - 35 U.S.C. § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6, and as far as understood, claims 7-10 are rejected under 35 U.S.C. §102(b) as being fully anticipated by Bensoussan et al. (U.S. Patent 5,025,134), Pearlman et al. (U.S. Patent 4,649,323), Simmons (U.S. Patent 5,481,452) and Weber (U.S. Patent 4,878,010). Bensoussan et al., Pearlman et al, Simmons, and Weber show, an apparatus for selectively energizing an AC electrical load comprising a gate-enabled thyristor alternating between on and off, dc power derived from the ac supply, zero voltage detector and a microcontroller, all of which are presumably mountable since they are light controllers.

Allowable Subject Matter

4. No claims are allowable over the prior art of record.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Rothenbuhler (U.S. Patent 5,955,847) shows an apparatus for selectively energizing an AC electric load.
